Art Unit: 1724

Claims 1, 7, 8,9 are rejected under 35 USC Sec102(b) as anticipated by USP 5616533 to Tavlarides. The patent describes removal of selenium from water using a compound containing quaternized amine. See claim 19.

Claims 2 – 6, 10-17 are rejected under 35 USC Sec103(a) as obvious over USP 5616533 to Tavlarides. It would have been obvious to have treated any selenium-containing waste stream, such as a waste stream from an oil refinery. The specified sorbents are conventional filter sorbents, so selection thereof for use in a filter to remove selenium would have been obvious.

A handwritten signature in black ink, appearing to read 'C. Barry', with a long horizontal flourish extending to the right.
